Research and intellectual property commercialisation utilising the UK's Lambert toolkit

7-8 September 2020
Royale Chulan Hotel,
Kuala Lumpur

Research and intellectual property commercialisation utilising the UK's Lambert toolkit

Higher education institutions (HEIs) and companies that undertake research and/or development activities intend to commercialise the outputs. However, projects are poorly negotiated and contracted on the outset, thus, hinders technology transfer at the later stage of commercialisation. This train-the-trainer workshop intends to build capacity in technology transfer and research management in a sustainable way. The training materials given will be good for enhancing awareness, competence and confidence in negotiating and contracting technology transfer activities based on UK best practice. The UK-government resources refer specifically to the Lambert toolkit. This comprises a decision guide, numerous model agreements (5 model agreements for one-to-one collaborations and 4 consortium agreements for multiple parties) and guidance materials to help facilitate contract negotiations involving universities and companies. So far, the toolkit has been adapted for international use between UK and India, China and South Korea.

Programme Synopsis

This train-the-trainer programme intends to build capacity and capability in technology transfer and research management amongst the HEIs and companies with research and development activities. It is designed specifically in order to give a practical hands-on exposure. Participants will be introduced to the challenges in commercialisation pathway and how to use Lambert toolkit as a resource. The programme combines the use of classroom delivery, classroom discussion and hands-on case studies as examples.

Learning Outcome

After completing the modules, you will be able to:

- Benefit from enhanced awareness, competence and confidence in negotiating and contracting technology transfer activities based on UK best practice
- Share the training materials and to cascade training to their own staff for local capacity development, upon completion of the workshop
- Understand the UK best practice in the contracting and management of technology transfer (the Lambert toolkit)

Delivery Method

Methods of teaching and assessment

- Flipchart presentations for brainstorming
- Group discussions
- Hands-on case studies
- Powerpoint presentations
- Presentation from participants

Target Groups

Participants are in technology transfer or research management offices from selected research-active higher education institutions and companies whom have research and development activities.

Programme trainer

Prof Deborah Hall

Prof Deborah joined University of Nottingham in 2012 as Director of a Biomedical Research Unit funded by the UK government in partnership with the Nottingham University Hospitals National Health Service Trust. She is currently Vice Provost (Research and Knowledge Exchange) in Malaysia with

responsibility for overseeing the research and knowledge exchange strategy, for research including commercialisation and technology transfer, as well as research training for postgraduates and academic staff. Previously, Deborah has been academic lead on an industry project with an SME pharmaceutical partner funded by Innovate UK, and continues to provide consultancy input to several SMEs in the medical sector. She is also Section Editor of the Elsevier journal 'Hearing Research' and maintains a 20% research contract as National Institute for Health Research (NIHR) Senior Investigator at the University of Nottingham.

Dr Angelina Yee

Dr Angelina began her career as an auditor and an accountant and she had gained wide international exposure in the area of accounting and auditing work while she was working in Australia, Singapore, United Kingdom and Malaysia. She is currently an Associate Professor in Nottingham University Business

School, University of Nottingham Malaysia, and Director for Executive Education. Angelina's research interests focus on university-industry collaborations including evaluating and managing innovations, coaching and mentoring system and process, governance and accountability matters, and multicultural and multi-disciplinary approach on regional collaborations. She has received research grants from the Malaysian Accountancy Research and Education Foundation (MAREF), MOSTI, MoHE/MoE, Australian High Commission and CPA Australia Malaysia Division. Previously, Angelina was the Head of Business Engagement and Innovation Services Unit in the University of Nottingham Malaysia, and the Director (Industry Collaboration/ Operations) in Nottingham MyResearch Sdn Bhd and Nottingham MyRIAD Solutions Sdn Bhd.

Mohammad Shariff Bin Ismail

Shariff graduated with an honors degree in Accounting and Finance from London South Bank University, UK in 1996. In 2001, he received the Master degree (MBA) from Northern University of Malaysia, Malaysia. In 2016, he continued his PhD at University Malaysia Perlis with a thesis title "Management

Innovation and Sustainable Performance among Malaysian Manufacturing Firms". He began his career as a lecturer at MARA Professional College, Melaka and MARA College of Kuala Nerang, Kedah from 2000 until 2010 before joining Universiti Malaysia Perlis (UniMAP) in 2010. He was appointed as the Deputy Dean (Academic) at School of Business Innovation and Technopreneurship, UniMAP in 2012 until 2016 before furthering his PhD study. In 2012, he was appointed as a member of Technopreneur At UniMAP Sdn Bhd (TUSB) Board of Directors until now. TUSB is a subsidiary company under UniMAP Holdings. Now Mohammad Shariff has been appointed as Chairman of Management Committee of TUSB cum Chief Operating Officer in February 2019. He has managed to secure the contract research project for more than RM5 million in 2019.
