A young boy with dark hair and a patterned blue shirt is looking intently at a computer screen. His hand is resting on his chin, and he appears to be in a classroom or library setting with other people blurred in the background.

Learning French for kids

Language play

Language learning

We believe that play is a state of mind that promotes imagination. Children learn best when they play. We create an environment free from judgement and limiting beliefs about fixed ability where learners feel confident to express themselves using new a language and discover themselves. The programme is designed to immerse the learners' experiences based on play, collaboration and interdisciplinary task-based activities. Learner will be actively engaged in intellectual inquiry and creative design.

Your child is interested in languages? Why not French! Children will learn French through series of task-based activities. Starting French at young age will make it easier to master. It will help learners go beyond the benefits of learning to communicate in a new language and even lifelong cognitive rewards.

Format

This programme consists of 7 sessions. Each session is 2 hours, conducted once a week. Each day, children will learn a topic. Games, songs, creative arts and task-based activities will guide them through the journey to learning French.

This module is designed for children aged 7 to 9 years old who have very little or no previous knowledge of the language.

Learning objectives

Upon completion of the programme, children will be able to:

- Exchange simple greetings
- Introduce themselves and other people
- Give personal information about family
- Use numbers 1-30, express dates, time
- Talk about things they like / dislike
- Talk about colors
- Describe physical appearance and personality

Expected learning outcomes

- To encourage learners' self-reflection, creative thinking and social-emotional skills
- To help develop a positive attitude towards language learning
- To cultivate team work
