Student Showcases

Location: Staff Cafe

School/Department	Showcase
Mechanical Engineering	3D Printing and 3D Scanning
Biological and Environmental Sciences	Microbial Illumination: From Jellyfish Genes to Glowing Bacteria Ever wonder how scientists make bacteria glow? By incorporating the Green Fluorescent Protein (GFP) gene naturally found in jellyfish, these bacteria now emit a vibrant light. Come see these modified organisms in person and discover how to identify different intensities of GFP expression.
School of Education	World Languages Showcase Come and explore different languages through interactive games and hands-on activities. Chat with our students to learn more about their experiences studying a world language at UNM!
Civil Engineering	Step Into the Future of Construction Experience structural behaviour with interactive Mola models and dive into immersive 3D worlds using our Building Information Modelling (BIM) VR technology.
