

Talis Aspire Online Reading Lists

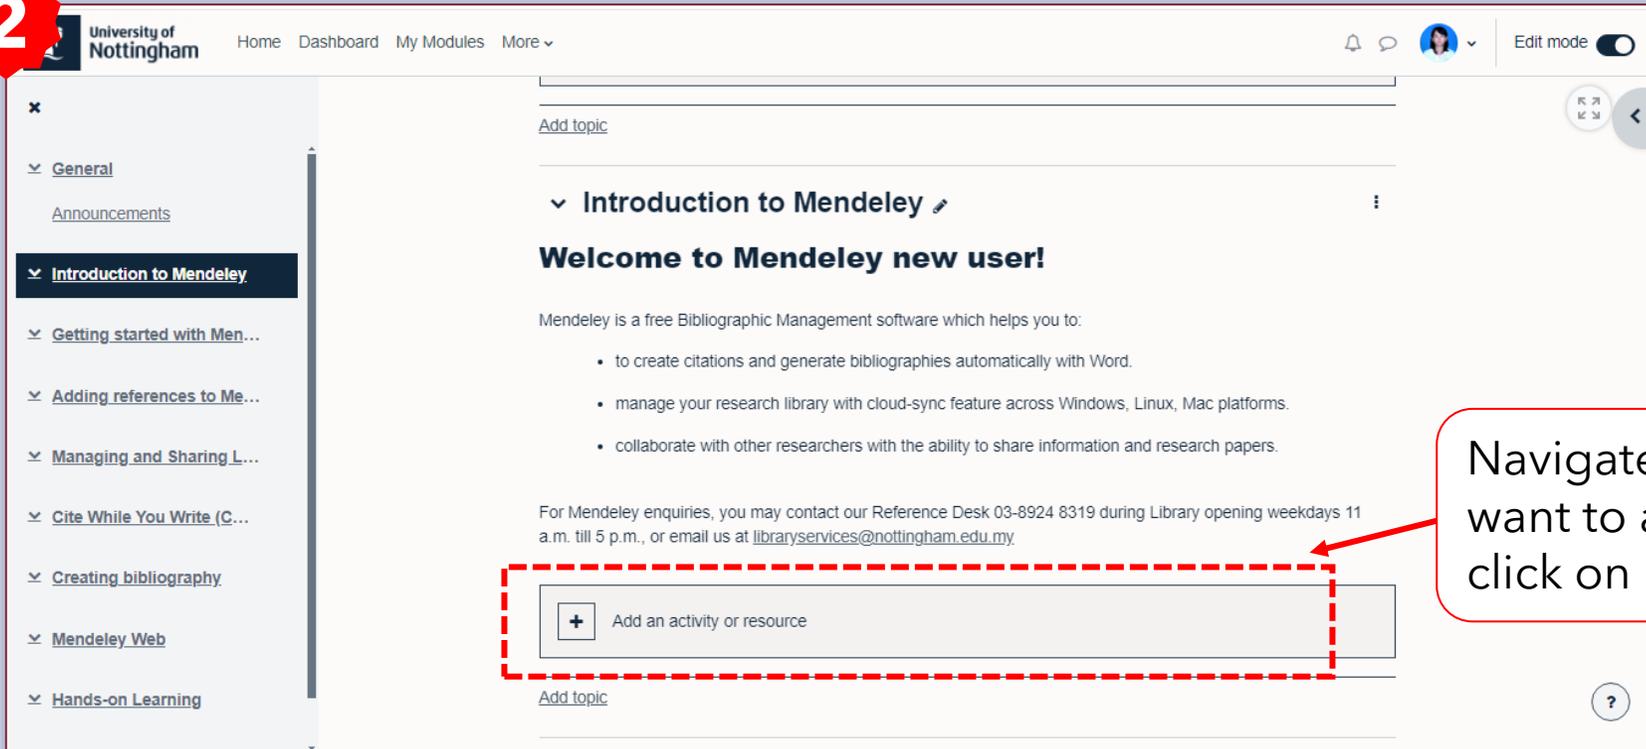

Steps to add Talis Aspire link as activity in Moodle

1

Turn on edit mode at your module Moodle page

2

Navigate to the section where you want to add Talis Aspire linking, then click on '**Add an activity or resource**'.

3

Find an activity or resource

Search

All Activities Resources

Absence form	Allocation form	Assignment	Board	Book	Chat

No sections

Embed list

By default, your module reading list will be linked directly.

However, if the module has more than one reading list or cannot be linked, you can search for the reading list by its title, module code, or creator name.

Once you find the desired list, click on '**Embed list**' from the search results.

If your list has multiple sections and you wish to embed Talis Aspire linking by section, you may click on '**Select section**'.

Send content change notification

Save and return to module

Save and display

Cancel

The activity name is automatically generated based on your list title. If needed, you can click on the box and edit it accordingly.

After you are satisfied with the content, click on '**Save and return to module**'

7

Open module index

Mendeley is a free Bibliographic Management software which helps you to:

- to create citations and generate bibliographies automatically with Word.
- manage your research library with cloud-sync feature across Windows, Linux, Mac platforms
- collaborate with other researchers with the ability to share information and research

For Mendeley enquiries, you may contact our Reference Desk 03-8924 8319 during Library o a.m. till 5 p.m., or email us at libraryservices@nottingham.edu.my
